

Microsoft Information Protection

Better protect your sensitive information—anytime, anywhere.

Microsoft Information Protection helps customers protect their sensitive data – wherever it lives or travels. Microsoft Information Protection enables you to discover, classify and label, protect and monitor sensitive information across a variety of locations including apps, devices, cloud services and on-premises repositories. You can customize your classification and labeling taxonomy to meet your specific needs, and apply a range of protection actions to your data based on its sensitivity – such as encryption, access restrictions, or visual markings. Microsoft Information Protection helps you meet your internal security goals and external compliance requirements.

Identify and understand sensitive information across your data landscape

Apply flexible protection policies based on your unique requirements

Extend information protection to 3rd-party apps and services using the multi-platform Microsoft Information Protection SDK, which enables you to integrate labeling and protection experiences into your apps and services

NC Protect + Microsoft Information Protection = Dynamic Protection Against Data Loss & Insider Threats Across M365 Apps

Nucleus Cyber's NC Protect solution leverages key Microsoft Information Protection capabilities to provide fine-grained, data-centric security for collaboration in Microsoft 365 applications including Teams, SharePoint, Exchange, OneDrive and Yammer. By combining Microsoft Information Protection labels with NC Protect's dynamic attribute-based policies customers will benefit from expanded protection and control over information access, collaboration and sharing.

CUSTOMER BENEFITS

- Leverages MIP labels in combination with other file and user attributes to control access to and apply information protection at file, chat and message level to prevent accidental sharing, misuse and data loss.
- Extend conditional access, usage and sharing policies across M365 apps for granular, dynamic information protection and next gen DLP.
- Gain unique information protection capabilities such as secure personalized watermarks, read-only access through a secure zero-footprint file viewer and dynamic views to hide sensitive information from unauthorized users.
